

FitnessSwipe

The app that connects people to train together

More shared workouts. Higher retention in your club.

A PROBLEM YOU KNOW

A large share of new members quits within the first months — most often those who train alone. People with a workout partner show up more regularly, stay longer and recommend the club to friends.

WHAT FITNESSSWIPE DOES

- Matches workout partners by level, goals and training hours — around your club
- Gym leaderboard and “club battle” — your members earn points for your club
- Live map — shows who is training at your club right now (a great social magnet)
- Challenges, sports events and a trainer catalog — a community built around training

WHAT YOUR CLUB GAINS

- Higher retention: members with a partner don't vanish after two months
- Free visibility: your club appears in rankings, on the map and in member profiles
- New clients: users look for gyms with an active FitnessSwipe community

WHAT DO YOU HAVE TO DO? PRACTICALLY NOTHING.

A poster with a QR code at the front desk is enough (we deliver a ready design), plus an optional social media post. No fees, no integrations, no work for your team.

Let's talk about a pilot in your club
